Designing efficient database schemas, data migration, and integrating third-party APIs (payment gateways, shipping, barcode scanners).

Custom Approval & Workflow Systems

Automating manual company workflows into digital flows with email/WhatsApp notifications and audit logs.

[03] About Me.

Hi, I'm Jovfrin a Full-Stack Developer currently studying Information Systems at Pamulang University. I have experience building CRM, CMS, e-learning, and ERP internal systems — from database design, REST APIs, to clean & responsive UI. Currently active as a Full-Stack Developer at PT Univerz Teknologi Utama, while accepting freelance projects. Ready to help from scratch to completion!

[04] Tech Stack.

The technologies, frameworks, and tools I use to build robust and scalable systems.

Languages & Core

JavaScript TypeScript PHP SQL HTML5 & CSS3 Python

Frameworks & Libraries

React JS Next.js Node.js Laravel React Native Tailwind CSS Express.js Nest.js Prisma ORM

MySQL PostgreSQL SQL Server Redis

Tools & DevOps

Git Docker REST API Postman Firebase Supabase
